DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art does not teach or render obvious an apparatus for shifting a keyboard comprising a base, a carriage movable on the base and configured with an upper surface for support of the keyboard and a palm rest movable on the base offset from the carriage and operably connected to the carriage through a coupler configured to enable movement of the carriage in a second direction when the palm rest is moved in an opposite first direction, whereby a user may place a hand on the palm rest and shift the palm rest in a selected direction so as to position a selected portion of the keyboard under the hand for ease of use.

Regarding claim 14, the prior art does not teach or render obvious an apparatus for shifting a keyboard comprising a base, a means for supporting the keyboard movable on the base, a means for supporting a palm of a user, the palm supporting means movable on the base and offset from the keyboard supporting means and a means for shifting the keyboard supporting means in a second direction when the palm supporting means is shifted in an opposite first direction, wherein the user may place the palm on the palm supporting means and shift the palm supporting means in a selected direction so as to position a selected portion of the keyboard for ease of use.

Art Unit: 2854

Regarding claim 15, the prior art does not teach or render obvious an apparatus comprising a base, a carriage slidably mounted on the base and configured with an upper surface for support of the keyboard, a motor mounted in engaging relationship between the carriage and the base, a palm rest slidably mounted on the base offset from the carriage, and at least one actuation switch mounted on the palm rest and operably connected to the motor, the actuation switch being configured to actuate the motor so as to shift the carriage in a second direction when the actuation switch is triggered by movement of the palm rest in an opposite first direction, whereby a user may place a hand on the palm rest and shift the palm rest in a selected direction so as to position a selected portion of the keyboard under the hand for ease of use.

Regarding claim 17, the prior art does not teach or render obvious a method of one-hand operation of a keyboard comprising the steps of positioning the keyboard on a carriage movable on a base, placing a hand on a palm rest movable on the base offset from the carriage, moving the palm rest in a first direction and shifting the carriage in an opposite second direction as caused by the movement of the palm rest in the first direction, whereby a selected portion of the keyboard is positioned under the hand for ease of use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
